

Job Title: Programmer Analyst

Term: Permanent Position

Location: Regina or Saskatoon Office

Tourism Saskatchewan is seeking an organized, self-motivated individual to fill the position of Programmer Analyst. Under direction of the Director of eBusiness and Technology, this position will provide programming analysis, application development, and testing for Tourism Saskatchewan websites and applications, including coding and programming in the .NET framework, script development, and the development of new applications in consultation with end-users.

Reporting to the Director of eBusiness and Technology, the duties of this position are:

- Design, develop, maintain, and interface complex web applications using ASP.NET, C#, DHTML, XML, JavaScript, CSS and other scripting/programming languages in the design and implementation of web application projects for Tourism Saskatchewan.
- Participate in website development within the Sitecore CEP Content Management System, and application development upon the Microsoft SharePoint and Microsoft Dynamics CRM Platforms, as well as other websites and applications as required.
- Participate in collaborations/design sessions with staff members from Tourism Saskatchewan, and third party consultants in the development of web/interfaces and applications.
- Participate in meetings to identify and respond to issues and make necessary changes to the applications.
- Maintain existing web sites and applications enhancing functionality to meet business and security requirements.
- Utilize database and programming API's to integrate web content from other Tourism Saskatchewan applications.
- Perform a full range of complex programming tasks using a variety of web and application based programming technologies and languages, keeping current with new programming techniques.
- Interface with a variety of Tourism Saskatchewan database systems and data structures in order to leverage the information for web applications
- Work with end users and programming team to develop complete business requirement specifications and application design specifications.
- Coordinate with technical team on the development of Test Plans and ensure complete testing of all applications.
- Maintain code and application libraries, instructions, and technical documentation.
- Create technical documentation for the programming team of all web applications as a resource for future development and troubleshooting.
- Assist personnel of other departments as a computer resource.
- Perform other duties incidental to the work described herein.

The knowledge, skills and abilities required for this position are:

- Demonstrated skill and programming knowledge using Microsoft .NET technologies to develop secure database and web based applications; Demonstrated skill and ability to write programs in the following languages: C#, DHTML, XML, JavaScript and CSS.
- Demonstrated skill and ability developing application-to-application communication interfaces utilizing web services architecture using XML and SOAP.
- Demonstrated skill and ability working within a development environment that ensures version control, testing, and deployment.
- Experience working with databases using MS SQL Server, including writing stored procedures and ad hoc queries.
- Ability to initiate and maintain cooperative relationships with co-workers, managers and supervisor and customers/clients.
- Ability to take direction, accept criticism constructively and to be diplomatic when reviewing work of others.
- Degree or diploma in computer science, or computer programming from an accredited post-secondary educational institution or an equivalent combination of experience and education.
- Excellent understanding of coding methods and best practices
- Experience working with Microsoft SharePoint and Microsoft Dynamics CRM would be an asset.
- Experience working with .NET MVC framework would be an asset.
- Demonstrated skill and ability to write programs VBScript would be an asset.
- Experience working with SiteCore would be an asset.
- Strong written and oral communication skills.
- Superior organizational and project management skills.
- Keen attention to detail.
- Consistent ability to meet deadlines while producing quality work.
- Ability to manage multiple projects at once.

Please submit your resume by 5:00 p.m. on Tuesday, January 22, 2019 to:
